

Leaving COVID Behind: A Technology-Based Approach for Closing Persistent Proficiency Gaps in Core Skills, and Putting Every Student on a Path to College and Career Success

Scenario:

As we leave the pandemic behind, we are seeing nationwide trends of uneven pandemic recovery. Despite some gains, overall proficiency levels remain below 50%, especially among marginalized groups like students of color, English-language learners, those with disabilities, and low-income students.

Opportunity:

Mitchell High School in Colorado Springs has a playbook to share for improving proficiency and student outcomes. In partnership with NROC, Mitchell High School defied pandemic trends, significantly improving student readiness for college by implementing EdReady.

Join a group of education leaders for the opportunity to collaborate on solving and overcoming student opportunity gaps. Led by key leaders from The NROC Project and Mitchell High School, together we'll chart a course for future initiatives and collaboration opportunities, leveraging our collective expertise to empower students and narrow opportunity gaps in schools and districts across the country.
